2011 Arts Facilities - Construction Projects

Narrative

We suggest you use about 250 words for the each of the following responses. Feel free to use bullet lists and remember that the readers may not be familiar with your programming or your facility.

Project Description ■ (Required)

Summarize your organization's mission, and describe the project for which you are seeking funds. Explain why it is a high priority for your organization, and how it will help you better serve your mission. Where are you right now in the overall time line for the project?

How will the project affect your operations during and after construction/renovation or purchase? For example, will the project change the type or frequency of your programs, raise or lower maintenance costs, reduce or increase staff levels, etc?

Project Impact ■ (Required)

Describe the benefits this project will provide externally to the community. How did you determine the need and has your community or audience been involved in developing the project? How will the project contribute to cultural opportunities in King County?

Relevant Expertise / Experience / Accomplishments ■ (Required)

Who will manage this project? List key members of your staff, volunteers, and outside consultants. Tell us why they are qualified and what role they will play in this project. You can mail in complete resumes if you feel it is important - we just want a brief summary here.

Project Implementation ■ (Required)

Describe your organization's plan for making this project happen. How did you develop the budget? What is your time line, and funding progress to date? Be as specific as possible about the sources you will approach, and about in-kind donations. Explain how you will change the project scope of work if you are unable to raise the total amount required for completion of your project as planned.

If this project has previously been awarded funding from this program, please let us know: What additional funding or in-kind contributions have been secured since you last received funding? What work has been completed? Have there been changes in the project time line, scope, or budget?
