Preserving the Stories of Fall City, published in November 2010, is the result of a three-year Memory Book Project undertaken by the Fall City Historical Society. Workbooks were distributed in 2007, and oral histories were done with selected individuals. Excerpts were then chosen according to section topics and graphics were selected from the Fall City Historical Society Archives and other sources. A total of 54 authors are included, with photos and short biographies at the end of the book.
