RESULTS BY SELECTED DISCIPLINES

While most people participate in more than one type of cultural consumption, audience traits by different disciplines do vary *to some degree*.

For example, people who participate in history-related content often have similar traits, as do people who are interested in literary events. Some activities, such as STEM (science, technology, engineering, and math) activities, are more closely tied to life stage, in this case the needs of parents and guardians of minor children.

To help individual cultural organizations better understand their specific audiences, this study examined the key traits of eleven cultural disciplines.

KEY TRAITS BY DISCIPLINE

Because most cultural consumers participate in a variety of cultural activities, audiences by discipline have far more in common than they differ.

For these results, overall points of agreement were set aside in order to identify more unique traits of individual audiences by discipline. What sets visitors to botanic gardens apart from concert audiences?

This is intended to enable cultural organizations to focus on emotional touchpoints and behaviors that are more meaningful to their audiences *in addition to those of the overall findings*, as well as to understand where greater concentrations of potential new audiences might be found.

HERITAGE AND HISTORIC PRESERVATION PARTICIPANTS

KEY TRAITS

35% of King County Residents Participating*

How they Participate

By visiting historical sites, learning about family history, supporting historic preservation, or watching documentaries

Leisure Time Patterns

- More likely to participate in traditional culturally-specific activities, read for pleasure
- Motivated by learning, curiosity, and connecting with their cultural traditions or heritage

How they hear about community events

Word-of-mouth, Facebook, Instagram, emails

Barriers to participation

Time, cost, distance

Cultural Activities Most Likely to Visit/Participate in

More avid visitors/participants of:

- History-based museums/sites
- Lectures and special speakers
- Cultural festivals

Desired Outcomes from Cultural Organizations

- Stimulation/support of cognitive health
- Greater connection to their history and cultural background
- More knowledge/education
- Greater connection to, trust, and understanding of people in my community

Demographic Characteristics

- Slightly more likely to be parents or guardians of elementary-age children
- Slightly more likely to work in technology/IT
- No significant differences by age, accessibility needs, race or ethnicity
